A QUOTE FROM OAHSPÉ

and

A Seance Communication -

- (Assoc. H.M.W., Fla.)

"Let it be premised, then, that the Etherian firmament is not a waste and interminable nothingness; but that, on the contrary, it is in many regions, even between the earth and the sun, sufficiently dense for a corporeal man to dwell upon, and to walk about, even as on the earth. Some of these Etherian worlds are as transparent as water or clear glass, and some opaque. Some of them are as large as the earth, and some a thousand times larger. Some of them are as immense facsimiles of snow-flakes; with arches a thousand miles high and broad. Some of them are as oceans of water; some transparent and some opaque; and some of them as dense clouds of ashes. But so great are the numbers and so vast the varieties of these thousands of millions of Etherian worlds, that description is impossible. Yet, by the telescopic power of the earth's vortexian lens, these worlds are magnified so as to seem to be nonentities.

"Worlds in solution, the Etherian heavens, are therefore governed by no power in, or escaping from, the corporeal worlds. In the language of the ancient prophets, they are a law unto themselves. And yet these unseen worlds have much power and influence on the vortices of corporeal worlds." (Oahspe, pg 583, American edition)

'Perhaps you will find this interesting, also:

'At a Seance held August 9, 1954, a communicator known to me by sight as well as by his own acknowledgment, but who prefers to remain incog., gave the following answer to a remark by me.

I mentioned that followers of Baha- 'Ullah had warned adherents in the U.S. to shun the cities of New York, Chicago, and San Francisco. He at once said, "And they should have added Los Angeles!" I inquired at once about San Diego, and he replied that at present San Diego is not in danger, and would be all right to visit if desired, but that Los Angeles should be avoided.

Since by their own confession they have - at least our group - little experience in correlating the times, this does not necessarily foretell present danger.

We were also told that the activities and ideas of our state diplomacy are naive, uninformed and bungling, but that there will be no third world war "unless someone makes a mistake - and the situation is such that a mistake can readily be made." He insists that the propaganda fixing attention on Formosa is diversional and that, no matter how disguised, Formosa is the destination of much of the force to be removed from Korea. In his opinion, Syngman Rhee is the only statesman who has been talking sense, and that Rhee sees clearly that South Korea is destined to come under Chinese control. That the reported withdrawal of 800,000 Chinese troops from North Korea is wishful thinking - "They hope it is true; but how far would they withdraw if at all?"

They have constantly ascribed the vagaries of earth weather to the effects of the bombing. 'You will learn of more tremendous explosions in Siberia. The Russians will not start a war, but are not afraid of one and will enter without fear if some one else will make the start. Their power has been steadily understated."

-end-

HMW

NOTE: Concerning the "ether-ships" of Oahspe. The Mark Probert Controls on one occasion remarked that 'certainly such ships existed and now exist, but one should not call them ships, since they may be as large as the planets and of any shape desired. . . They are best thought of as existing in etheric matter, and many of the descriptions of etheric worlds and lands and beings as given in Oahspe are authentic. As to the book called Oahspe, it was dictated by a group of very ancient spirits. . . .'

These M.P. Controls have often explained that they cannot (usually) fix the time of coming events with any exactitude - and as to seismic disturbances, conditions are constantly changing, so that one region is threatened now, but in a week or a month the danger may be centered elsewhere. A really imminent disaster can usually be detected - yet not always. This seems to be commonly admitted by intelligent and honest communicators.

The MP Controls have been fairly accurate in predicting increased incursions of the aeroforms, and have lately said that such an increase would be noted within the next few months. They have always maintained that the bomb experiments had far-reaching effects on the weather and planetary conditions in general.

- - - -

GROUP MEASURES PRAYER'S EFFECTS is the heading of a two-column article by D.L. Thrapp,

Los Angeles Times Religion Editor, in Times for August 15, 54. This amounts to a large-scale and properly controlled demonstration of the effects of thought-'energy' or prayer or mantric practises, on germinating seeds and young plants - and have often been obtained by Max Freedom Long, Edgar W. Block and other experimenters. In the words of the columnist:

"Prayer can make seeds germinate and plants grow luxuriantly, while negative thoughts can kill them, according to the Rev. Franklin Loehr, Director of Research for the Religious Research Foundation. For nearly three years he and the members of his foundation, 551 So. Gramercy Place ... have prayed and pored over some 24,000 seeds in 900 unit experiments under rigorously controlled conditions. They have photographic evidence that to them proves (1) seeds so treated germinate faster than others (2) Negation or negative thoughts can stunt, cripple, and kill seedlings, or even prevent germination (3) Water prayed over can cause seeds to germinate with more than natural efficiency (4) Prayer and its reverse has a measureable effect on the world in which we live.

The application of these findings (columnist Thrapp points out) to human relations and individual lives is limitless. A scientific demonstration, he writes, of such rites as the blessing of the fields, the effects of incantations and curses becomes possible. A two-column picture of seeds of corn, half of them prayed over and the others negated, gives a striking contrast of results. "Mathematicians have calculated that some of the Foundation's experiments could be duplicated by chance only at odds of one to many millions".

Facts of this nature have of course been known and partly understood for many thousands of years. They belong to the 'borderland' of human knowledge. They have been utilized by Adepts in all ages, by priestcraft and miracle workers of all degrees. The cultist or devout religionist, however, never sees a discovery in its true perspective. It is taken to verify some miracle, and this in turn as 'proof' of some theological dogma - hence of a whole system of distorted and fanatical ideas. A "new" fact (new to the finder) has a desperate time of it. Every dogma-ridden human wants to adopt it or to destroy it. . . I am not commenting now on the enlightened work of the R.R. Foundation mentioned above, but on an invincible bias of human nature.. The BSR publications make almost no use of religious and theological terms, and the reasons are in part obvious - even though millions of people consider them rays of transcendent truth.

9-1-54

(Item from Washington Daily News, August 15, 1954) -- Radio is shocked by the middle-of-the-week dismissal of Frank Edwards by the AFL.-Network commentators rarely get 'rified' so suddenly, especially one who has worked the same stand for so many years. There should be some sizable repercussions -- especially when the listeners, including AFL members, start writing and shouting in." (BSR ASSOCIATES TOO, WE HOPE). (Cr. Assoc. Clara John)

(Corres. of Assoc. M.C.) ". . . I have before me a special issue of "C.E." published in New York (225 Lafayette St., New York 12, N.Y.) which will go on the news stands in December, but which anyone can get direct from their office now, by sending 15¢. They say Saucers were never seen until after the atomic bomb test in 1947. They hint that the hydrogen tests may pave the way for an invasion, and feel the public should be warned. It gives authentic information of sightings and registrations on the radarscope. A formation of seven were registered on the scope, and also seen over the White House and Capitol on July 19, 1952. The Government is making "Saucers" a top military secret, probably fearing mass hysteria".

(If the above account is correct -- I am certainly NOT impressed by any alleged revelation which asserts that 'saucers' were never seen until after the bomb tests began - the statement is ridiculous. The rest of it appears to be one more threshing of old straw.

(-- Re, the Frank Edwards matter, and omitted above: He was sponsored by the American Federation of Labor, A.F.L. Bldg., Washington, D.C., and broadcast over the Mutual Broadcasting System, Hdqrs. 1627 K St. N.W., Wash. DC. - in case you wish to write to him or to his former employers. Did his interest in aeroforms have anything to do with this shut-down? Our guess would be SI-SI 'senor'!

MEMO. FROM ASSOC. MRS T.M. Los Angeles, Aug. 19, '54:

I understand a man working for our company has a brother who is a patrolman in Monterey. That last Sunday night (8-15-54) a "saucer" containing six persons (looking like entirely normal human beings) landed in Monterey Park. The saucer was immediately surrounded, people were taken away, all news and TV representatives were warned not to say one word about it, under penalty. The FBI was also present. . .

As you may have read in the Los Angeles Examiner of 8-16-54, two policemen said they saw an object two feet in diameter that same night (Sunday 8-15-54).

Whether or not the story of the six people is an exaggeration of the 2 ft. object, or a different sighting by different people, I have been unable to find out...

T.M.

- - - -

People who constantly complain about lack of data, evidence, 'proof' and so on, should take a few months of their own time and try tracking down reports similar to the foregoing. Mrs T.M.'s memo. is excellent and covers all the facts accessible to her, and we have good reason for considering it plausible - even probably correct. But the value of such reports is cumulative (exactly as has been the case in psychic research and spiritualism for decades past); their combined weight is overwhelming, but under present conditions no single instance can be called proof - unless you personally believe it. PROOF is defined in a legalistic sense as "evidence sufficient to convince beyond reasonable doubt." When is a doubt 'reasonable', how is 'evidence' defined, and by whom? It pays to examine our personal criteria.

September 1, 1954

(Correspondence of Rev. H. A. Cronk, St. Paul, Minn.-- ". . .I wonder what kind of space-ship Edsel Ford used when he died and came to St. Paul, attended our seance, and shook hands with me. Then was surprised when we told him he had died, and had to tell him it was in the evening paper. He agreed to go back to Detroit and see his father, to see if he would recognize him; then return, and tell us what he discovered. So, off to Detroit or Michigan he went on some kind of conveyance, and in about ten minutes was back, announced his name, and told us we were right - but it was a great surprise and shock to him. He couldn't understand it, as he had shaken hands with me in a perfectly natural way, as though he were in the earthly state

The being "Moroni" that visited the physicist is good. One time I was visiting with a girl friend whom I knew(at a materialization seance), but who had passed on. I noticed she was about two feet shorter than she had usually appeared. When I mentioned it to her, she said, "Just a moment", and instantly she built up to her normal size, and kissed me on the forehead -- our usual proof that we understand when we talk with each other at a materialization seance."

(NOTE): The Rev. Cronk has long been engaged in the study of 'psychic photographs' or skotographs, obtained without camera or lens on sensitized plates. The term skotograph really means "dark writing", and is applied to writing obtained on plates in unopened packs, and similar effects. Elaborate drawings are often obtained in this way. "Thought photography", a related phenomenon, is easily obtained by holding the plate against the forehead or solar plexus. We have occasional inquiries about this, and suggest that Associates who are interested write to Rev. H.A.Cronk at 2465 Territorial Road, St. Paul 4, Minn. ml

IS CANCER CURABLE is the title of a newly published compendium, by William Kullgren, Editor of The Beacon Light Herald (Box 756, Atascadero, Calif.) A 6 x 9 book, paper, 96 pgs. \$1.00.

This useful compendium contains two articles (12 pgs) by Dr. Harry M. Hoxsey; five by Dr. Gerald B. Winrod; the Fitzgerald "Progress Report" to the Hon. John W. Bricker. Other titles: The Hoxsey Clinic - Socialized Medicine - The Power that Cures -- Can you Live 120 Years? -- Medical "Science" in the News -- Living Food -- Cancer is Curable -- The Perfect Blueprint. We have had requests for a compendium of such material and one of our Associates has been preparing something similar. Nine-tenths of this book is information of a badly needed sort. Read it yourself and send a copy where it will do the most good. (Order from publisher, not from BSR).

THE KOCH TREATMENT FOR CANCER. BSR Hdqrs can still supply this 30-page booklet, compiled by Meade Layne, @ 1.00. In spite of the vicious attacks of the AMA, the Koch treatment has a long and favorable record, and evidence as conclusive as any now publicised concerning the Hoxsey treatment mentioned above. By sending information concerning these two methods, along with several others which also effect many cures, to every sufferer from this disease, the tyranny of organized medicine in this country can be broken.

We are in receipt of the February '54 issue of the SAUCERIAN, (60 pgs). Printed by Gray Barker, Box 2228-Clarksburg, W. Va. "World's largest Flying Saucer publication". Interesting and diversified material. The current issue favors us with a statement of the "4-D" or etheric interpretation, advocated for eight years by the BSR. (pg. 45 ff).

Britain Silent on Enquiry into 'Flying Jellyfish' - is the heading of a London dispatch, August 14(UP). "The pilot of a British overseas stratocruiser reported seeing a dark speeding object escorting his airliner near Gander. The big object which kept changing shape like a jellyfish was accompanied by a half-dozen smaller object, crewmen said . . ."

Assoc. E.S.S., who sends us the above clip, points out that "it is in full accord with the etherian concept of Emergence - now you see it and now-you-don't. Currently rampant stories by materialistic saucer fans and saucer riders, to the effect that aeroforms are merely space-craft turned out by some planetary machine - shop assembly line, are doing nothing to clarify things for the already over-befuddled public and officialdom. If these gentry persist ... they may go berserk from the contradictions . . ." (ESS)

We are told on seemingly good authority that certain technicians who have had an opportunity to study such craft under Etherian guidance, have done just that - gone berserk. The actual process of mat and demat was more than they could take.

But the object in quoting the above clip was to call attention once more to the mutant nature of these objects. Mutations of shape and size have been observed thousands of times (along with speed and color). This^{is} perhaps the most important point of all, in any effort to understand these 'craft'. These jellyfish antics point to a kind of matter, and a kind and degree of control which are unknown to us. When one of them lands, it appears to have a super-hardness, beyond that of finest steel; yet it is reliably reported that such a steel-hard disc may become translucent and transparent, and so vanish with^{out} changing location. And this mode of disappearance by the 'air-borne' discs is probably more common than withdrawal in space.

WHY are these phenomena of mutation never reckoned with, or even noted, in all the endless speculation about the Discs? WHY are the most obvious inferences wholly neglected? These things are made of etheric matter - called that for lack of a better name, if you like. (And so, of course, are all objects of our own world also, in terms of origin). Objects made of etheric stuff are subject to control by countless radiations and by the 'energy' of thought. These mind-projected shapes are as fluid, as mutant, as incredibly swift as are the thoughts of their creators.

Why take this for a greater mystery than any other? Mental control of matter, of cells, of atomic or sub-atomic 'particles' is known and demonstrated on our own plane - save to the dyed (or died)-in-the-textbook scientists. What will become of this lost tribe, when teleportation, apportionation, mat and demat and no end of other "occult rubbish" are seen to be basic postulates of scientific thinking?

So, a landed Disc, being apparently made of some unscratchable super-steel stuff - must be just that, forever and ever!! The hypnosis of the visible-touchable world! See, you can rap your knuckles on it - so it must be real - no silly vaporous etheric stuff about that!! Look away for a moment (to Dixie) - or don't look - and pouf! it is gone. Like Bethurum's cigaret lighter (or did the lady snatch it?), or the vanishing cafe customers he tells about. But vanished where? Into the Neant? And just what is the Neant? Space? The ether? Out of sight, touch, knowledge anyhow. But not out of existence, because it may pop back at any moment. And do you really think that science and metaphysics cannot take bed and board together - or are other-like than the two ends of the same stick? As long as human thinking has any coherence about it, any rationality, this pair will find no divorce. Le Olahm!

I think the basics of the new age will be really new, in science, religion, philosophy - no scarecrow patched up out of frayed outmoded garments. That is because the crow is the 'tomorrow bird' (from always saying, cras! cras! cras!), and not to be put upon by familiar frauds.

"C.Q.C." C-5'MATTER IN REVERSE'

(NEWSCLIP)

- PARTICLE FROM OUTER SPACE IS TERRIFICALLY DESTRUCTIVE - (by Rennie Taylor, A.P. Science Reporter)-- Seattle, Wash. (A.P.) -- The first substantial evidence of the existence of stable "matter in reverse"-- a particle from outer space which annihilates the basic material of all earthly substances--has been found by a University of Chicago scientist.

From somewhere out in the Milky Way or perhaps from some more distant island universe this strange bit of matter came to the top of the earth's atmosphere last winter. With tremendous energy it struck an aluminum-covered film pack being carried by a cosmic ray research balloon high over Texas.

The space particle went through the film pack like a bullet through a deck of cards. In doing so it produced a scientifically thrilling sequence of what appears to be the conversion of earthly matter into energy and then a reconversion of this energy into another form of earthly matter.

A report of the event was made before a meeting of the American Physical Society here yesterday by its discoverer, Dr. Marcel Schein, one of this country's foremost cosmic ray scientists.

Dr. Schein said the only conclusion he could make so far was that the strange visitor was something which nuclear scientists have been seeking for years -- an antiproton.

The term antiproton is an exciting word even among atom scientists. It is their way of describing the basic particle out of which reverse matter presumably is made. This is called "contra-terrene matter", or "matter against the earth".

Theoretically, an antiproton is the counterpart of "opposite number" of a proton. The proton is the core of the hydrogen atom and the main substance out of which all ordinary matter is made.

When an antiproton and a proton collide they presumably destroy each other. That apparently was what happened, Dr. Schein said, when the space visitor hit the film pack. It collided with a proton in the aluminum covering of the film pack.

For scientists the implications are far-reaching. They suggest that somewhere in the universe there exists a means of annihilating or converting into energy all the various kinds of matter known on earth.

It also lends support to something else which scientists long have suspected-- that somewhere within the realm of creation there may be forms of matter made entirely of contra-terrene particles.

There is no danger that anyone will corral a lot of antiprotons and destroy the planet. They are too scarce and hard to handle. If they ever are produced artificially they will come only from the biggest atom-smashing machines and will be used to check nuclear theories. In this way they could lead to a new understanding of matter and perhaps great benefits with new forms of atomic energy.

The story of Dr. Schein's particle is told by a picture of tracks made by the debris of the collision.

First the proton and the supposed antiproton vanished and a shower of photons or X-ray impulses appeared. The two particles thus presumably were converted into X-ray energy. The X-rays in turn produced pairs of electrons. This is a common occurrence in high energy atomic activity.

Since electrons are considered material substance rather than energy, there was a double conversion, first from matter to energy and then back to matter.

The picture, which shows only the electron production, is unusual. It shows electron tracks only. In pictures of ordinary atomic disintegrations the tracks of particles other than electrons usually appear. The fact that a pure electron beam was produced is one point in favor of the conclusion that the particle was an antiproton.

Dr. Schein calculated the energy of the space particle at 10 million billion volts. - (from reprint in Palo Alto Times, Friday, July 9, 1954.)

--(Cr. Assoc. Lallie Hall)

17 and BLACK is the title of a new book by Assoc. Jack Waer. Wholly fictional, but at the same time intensely realistic, dealing with an unusual subject (professional gambling), and written out of 25 years of experience as manager of casinos. The story is instructive and gets better as one gets into it. Published by the Viking Press, 18 E. 48th St., New York 17, N.Y. Price \$2.75.

Fairy Crosses. These well-known natural formations, valued as 'charms' and lucky pieces, can now be obtained from Assoc. S.N. Green, who operates the Gem Exchange, (Gem Village), Bayfield, Colo.

"The best scientific minds*in the world agree that some planet out there is sending these things to look us over". So says Frank Halstead, head of observatory of Univ. of Minn. (mutual 7/20). (Foregoing sentence quoted from the newsy Little Listening Post, 4811 Ill. Ave. N.W., Wash'n,D.C.) . (*"Best minds" ought to do a bit better)

C.R.I.F.O. NEWSLETTER. Leonard H. Stringfield, Ed., Carries important data. Write to 7017 Britton Ave. Cincinnati 27, Ohio.

THE COMING OF THE GUARDIANS: a 60-pg mimeo book consisting mainly of statements made by the Mark Probert communicators (deep trance mediumship) concerning the aeroforms. The "4-D" or etheric interpretation of these phenomena was first given by them in 1946, and holds good in the light of all subsequent data. This has been and remains the only intelligent, constructive and inclusive explanation offered anywhere. It comes from incarnate humans with whom we have had weekly meetings for eight years - and whom we have found to be highly informed and honorable persons. The science and metaphysics of the future will be rooted in these concepts of the etheric worlds, races and cultures.

First (mimeo) printing available @ \$2.00. In plastic binding, \$2.50. Improved reprint, ready about Sept. 1, \$3.00. A BSR publication, compiled by Meade Layne.

THE STORY OF CREATION - a mimeo book containing a remarkable account of the origin of the material universe and of our planet, as given by the Yada di Shi'ite and the Maharajah Natcha. Selected from The Magic Bag and reprinted by permission of Mark Probert. Dictated by clairaudience. Price, \$1.50. (NOTE: Mark Probert has recently returned from an extended trip through the eastern States, where his mediumship received most respectful attention from numerous scientists and professional men. He is undoubtedly one of the most gifted trance mediums now living. ml).

Concerning the BSR INFORMATION LIST for correspondence, published in our last issue of CQC (C-4): we have these two pages as a separate mimeo, available on request. If you wish your own name to appear, let us know. The list is designed mainly for foreign associates and correspondents interested in Aeroforms.

=A 'General Information Pack' of mimeo pages descriptive of the BSR and our publications, will be sent without charge to anyone interested. This is a good way to acquaint your friends with the BSR activities. _ _ _ ml _ _ _

- "Flying Saucers On The Moon", by Harold T. Wilkins, well-known explorer & author. - (330 pages). Order from: The Citadel Press - 222 Fourth Ave., New York 3, N.Y.-- price- \$3.50. (Or, from BSRA - \$3.50).

Biometric Analysis of Flying Saucer Photo- graphs

This is a 27-page brochure published by the Archers' Court Research Group, Associated with the Society of Metaphysicians Ltd, Archers' Court, Hastings, England. This group also publishes the Handbook of the Aura Biometer, (duplicated: 5/6; \$1.00). "Radiesthetic testing instruments, including the new Aura Biometer, can be obtained on request. Biometer with all accessories & Handbook: 5 pounds/5 s. plus 7s/6 d postage." (Your postoffice will remit by International Money Order, separately from your order, at exchange rates, about 6 s to the dollar).

This is highly important research, so far largely neglected - partly because the Aura Biometer itself is an unfamiliar instrument, as fantastic to most scientists as was the "impossible" X-ray, the radio, and the flight of heavier-than-air craft. All tests and readings are checked by a rigid system of controls, many examples of which are given in the brochure here referred to. The following semi-quotes may also be of interest:

The Research Group has tested the aura radiation pattern of the original Adamski photographs of 'Saucers'. Up to this time there had been no scientific proof of the validity of these photographs and their implications. Mr. Desmond Leslie has supplied a complete set of uncontaminated photos.

'All objects radiate energy in a pattern which seems to comprise series of spherical shells, of characteristic spacing & nature. The Aura Biometer detects & analyzes these. . . The method is; to select control samples, and compare these with readings from unknown objects. This reveals whether the two can be identified. It is important to note that the "radiesthetic waves" or energy flow is at 200,000 times the speed of light. They operate in a higher ether or medium. . . The method is a 'transcendental' form of instrumentation which cannot be deceived by any fake of physical origin. . . Facts revealed in this way indicate that some of the objects photographed are undoubtedly space craft of unknown motivation, while others are questionable from a biometric point of view. . .

Results so far tabulated make it evident there is something about the photographs that transcends normal 'earth-bound' materials; that something of great power is bound up with those objects; a power, indeed, consistent with space travel and all that it implies. . . The strange cloud or haze seen on one of the Saucers shows "life readings" . . . which suggests that it has come in contact with living beings. . . The "power-coil" of the saucers also shows life readings, and this fact conforms to the requirements of certain semi-psychic machine theory. . . Here again we have clues to the mode of propulsion and control. . . There is evidence that the propulsion is in some intimate manner connected with the life of the crew. . .'

The words I have underscored in the paragraph above are of great importance. We have persisted in describing the Discs as Chakras of living force. They are living materializations in etheric matter, just as our own bodies are also mind-created & alive. From such materialization they emerge onto other frequencies by converting their energy-rates. Little by little, this concept is gaining ground, especially among investigators in England. Just as an incarnate human, materializing in the seance room, gives himself a human shape, so an etheric being also takes a human shape and builds a 'ship' of our rarefied matter, to manifest in a way which we think we can understand. How else could he appear and be intelligible and acceptable to us? We urge all investigators to consider this "4-D" approach very carefully and seriously, and to be very slow to reject ideas which seem "metaphysical" and abstract. Text-book science is helpless in this impasse, unless integrated with certain basics of occult knowledge.

(ml)

A LETTER OF IMPORTANCE from Dr. George Hunt Williamson -
Director, Soulcraft Research Laboratories.

. . . First of all I want to thank you for sending me your excellent releases and publications. I do find them exceptional. My new book is going to confirm MUCH of your own work over the past years. It will be an eye-opener. . . I wanted to ask you, if you published the information about the copper or carbon rods (vril ?) that the Gods held in their hands and how these were used to cure ailments by certain vibrations . . .

Also, I noticed in your CQC-B-10, pg. 7, May 15, 1954, in the correspondence of H.T. Wilkins, that he is vitally interested in the Hunrath-Wilkinson glyphs. As you know, I knew Hunrath very well, and our Arizona group received these symbols originally. I gave part of them to Hunrath, and after he disappeared in that plane the symbols were found in his room, but no one knew where they came from. They came from me and my researcher, and the complete set of them is included in my new book. Wilkins said: I know not how came Hunrath or Wilkinson to have all this very peculiar and recondite knowledge which cannot be picked up in a day, or even in a year.

Will you please put the above information from me in your next releases. I would like people to know where these symbols came from and what they are. FATE magazine misinterpreted them but I think Wilkins is close to the answer. Many of the ruins of the interior Matto Grosso are the most ancient on earth above water at the present time. They are related to Lemuria etc. The motif is similar to Greek architecture. Remember Col. Fawcett's doomed expedition that went looking for these ruins?

Will you print the above under your Correspondence heading? And perhaps you can put me in touch with Wilkins, as I believe I can give him much more on the glyphs than is now known. How we obtained them is an astounding tale in itself. May God bless you in your work -

G.G.W.

(To M.L., BSR Director
September 9, 1954

- - - -

As to the inquiry about the Rods: Dr. Williamson probably has in mind our booklet entitled VITIC, which deals with psycho-physiological effects of hard carbon used in conjunction with a permanent magnet. Ancient Egyptian drawings show the Pharaoh holding short rods, one in each hand. It is believed that one of these was a loadstone, the other carbon. Our tests with the galvanometer showed a greatly increased deflection after holding these elements for a few minutes. The story is too long to summarize here, and the booklet is temporarily out of print. We hope to reprint in 3-4 weeks - at former price of \$1.00.

I am glad to call attention again to the matter of the glyphs, and to give full credit to Dr. Williamson's industry and exceptional information. We look forward to his promised publication of the full set of the glyphs and to any information he may be able to supply.

Assoc. H.T. Wilkins, to whom Dr. Williamson refers, is the author of the very fine book. Flying Saucers on the Moon (published in this country under the title Flying Saucers on the Attack - a change not authorized by him). Assoc. Wilkins can be reached at 29 Bean Road, Berleyheath, Kent, England. The American edition is published by: The Citadel Press, 222 - 4th Ave., N.Y. 3, N.Y., @ \$3.50

Dr. George Hunt Williamson should be addressed: PO Box 192, Noblesville, Ind.

If any of our readers have copies of the VITIC brochure, we shall be glad to purchase a few at original price, \$1.00, currency or credit.

FRANK EDWARDS: The N.Y. TIMES, commenting on the resignation of Frank Edwards as AFL commentator, says in part: The AFL feels that Mr. Edwards failed to draw a line between news and opinion, and overweighted his programs on the side of labor generally. Mr. George Meany, Federation President, insisted there was no question of censoring the broadcaster's opinions, but that he "omitted the stuff he wasn't interested in". Also at one time "he asked his audience whether they wanted him to continue his broadcasts on flying saucers. We were swamped with mail about flying saucers and the subject was not what we were particularly interested in."

One might suppose (very naively, no doubt) that any subject of such intense public interest as to 'swamp the broadcasters with mail' would find a place somewhere, for a few sentences at least, among the endless leagues of twaddle now filling the ethers. An airbase reports "about 700 sighting a week", and 700 sparrows in Time's Square would get more attention from the misnamed news services and 'officialdumb' generally. The public, in short, is being cheated out of all-important news, and out of an imperative mental conditioning! But let us reflect that "it is all done for our own good" - and that the way to cushion the public mind against shock is NOT to make any preparation for it !!!

"Mr. Edwards began broadcasting for the AFL in 1950. He received \$35,000 a year for his services." He has had 25 years of radio-news experience."

Cr. Assoc. ESS

SILVERY OBJECTS A MYSTERY - (or, mutants again): "Ground observers disagree on shape of what they saw". Five mysterious objects, sighted in the skies, Phil. ^{arg}arga, were 'investigated' by jets from the McGuire AF Base, but the pilots 'found nothing'. Most observers said the objects were silvery, but there was no general agreement as to shape. Some said they were oblong, others that they looked like sausages, others that they were shaped like a three-quarter moon. The two theories advanced, that the objects were either weather balloons or radiosondes, were officially discounted. (Now, 'what is so rare as the day in' August or other month, when the airforce or weather bureau discounts an explanation of that type?).

Phila. Inquirer, 8-24-54

THOUSANDS SEE SAUCER ... etc. Brilliant sausage-shaped object, also described as saucer shaped, or as oblong. Reported in Phila. Bulletin of 8-23-4. Might have been part of same sighting mentioned above. But sabrejets sent up from Newcastle AF Base evidently reported something, though it "wasn't a flying saucer" according to the C.O. at the base. Some ground observers reported a weather balloon, which this time was not "officially discounted".

(Cr.Assoc. Lavinia Bass, both items

HURRY, HURRY - Get into the right bracket.

"ATOMIC PROOF CITY TO COST \$50 million". This will be constructed in Minneapolis on a 1000 acre project. "It will have schools, City Hall, businesses, and homes in the \$15,000 to \$25,000 bracket, equipped with Geiger counters, bombproof bedrooms and other innovations geared to the atomic age ... Surrounding the entire project will be a Venetian canal. Hal B. Hayes 'multi-millionaire Hollywood contractor' says that the atomic city will 'take a realistic view toward maximum protection...'"

Editor's comment on this: OH? !

San Jose Herald-Mer.
Cr. Assoc. Laura Wood.

HOT METAL SPRAYS AREA, FIRES ROAD: No explanation has been found for a shower of white-hot metal pellets which hit a rural area a few miles east of Redwood City, Calif., setting fire to a 100-ft. section of a macadam road. The pellets ranged in size from a dime to a 50 cent piece, and rained down on the area near Woodside shortly after residents in the vicinity reported hearing an explosion. The Woodside Fire Chief said the metal shower burned holes in the road surface a quarter of an inch deep. . . small brush fires were started. Some fifty pieces of metal, some still too hot to

hold, were recovered from an arearoughly 70 by 270 feet. . . The metal scraps had regular marking and appeared to have come from a cylindrical object. An AF spokes-
man advanced the theory that the metal came from a jet plane exhaust pipe, which
reaches extreme temperatures in flight.

San Jose Herald-Mer. Cr Laura Wood.

(If this hot stuff had fallen on a close-built urban area . . .!)

We are in receipt of a 5-page PARTIAL LIST OF ORGANIZATIONS & INDIVIDUALS
STUDYING THE UNIDENTIFIED FLYING OBJECTS THAT HAVE MANIFESTED THEMSELVES THROUGH-
OUT THE GLOBE. "For all correspondence, June through September, address R.E.BARTLETT
JR., 2154 Woodward Ave., Lakewood 7, Ohio.." The list contains about 30 items of the
kind mentioned, many of them foreign and given in both English and French. It is
quite possible that conditions may develop so that a rapid exchange in information
will be of importance. We recommend that this list be obtained, and combined with
another partial list printed by us in CQC-C-4 of August 15, '54. We hope to obtain
a number of these, with permission to charge enough for them to cover cost and
postage - in which case BSR Hdqrs. will be able to supply. But until further notice
please get the list from Mr. Bartlett at the address given above. In writing to
us about this list, please refer to it as BARTLETT LIST NO. 1.

The Bartlett List received by us makes no mention of any charge, but a stamped
and self-addressed envelope (9½ or 10"), or stamps only (3¢), is always helpful.

Air Technical Intelligence Center, Wright-Patterson Air Force Base, Dayton, O.
is described in the Bartlett list as "superficially cooperative - actually mislead-
ing".

Item re Frank Edwards. F.E. is not now broadcasting.

Ohio Northern University: Project A. Ada, Ohio. Not now active.

Fortean Society: Favorably described by Bartlett, but BSR has many complaints
about delays and indifference of the present F.S. Secretary.

Civilian Saucer Investigation: Now closed.

International F.S. Bureau (A.K. Bender). Closed.

Extra-terrestrial Research Organization (Cleveland, O.). Disbanded.

Harold Wilkins: His excellent Flying Saucers on the Moon, published under that
title in England, has been published by Citadel Press, NYC., under the title: Fly-
ing Saucers on the Attack. This title is misleading and the change was made without
consent of the author and is not approved by him.

For those interested, we recommend that the memo. on this page be attached to
the Bartlett List, along with the list from our CQC-C-4, mentioned above.

"All imaginative thinkers today recognize that our contemporary civilization
is in a desperate condition, and that if disaster is to be avoided a new foundation
must be provided. . . This is not a vague and sentimental conception, but one
that commits us to something definite and comprehensible. The possibilities offered
us by scientism, intellectualism and humanism - and, one must add, conventional relig-
ion - cannot meet our needs... We must learn to think in new categories... This will
lead to a progressive transformation of our conceptions in every field of thought -
religion, art, philosophy, science, psychology and sociology .. and these different
aspects, now artificially separated, will be seen to be organically related...."

This quotation comes (oddly enough) from a commercial publishing house - in this
case the announcement of the founding of the Omega Press, Reigate, Surrey, (Eng.).

The basic situation seems to be grasped - but not its urgency and the increasing
tempo of events. The cultural readjustments of history have had, so to speak,
plenty of time for their happenings - nor have they been keyed in with physical
events of a planetary order... To 'think in new categories' at once is a desperate
requirement.

CORRESPONDENCE - -- - MISCELLANEOUS --

"First well-known victim of the "Saucers": Nationally known broadcaster silenced because he talked too much about the Etherians who are preparing to take control of Homo-the-Sap before he uses his knowledge of atomic chemo-physics to sap himself out of existence and Nova-vitiate the solar universe - as one might say.

"Is this the true reason behind the firing of Frank Edwards by AFL Boss Meaney - or did he really slant his news so heavily to the labor side as to cause reactions? This last was the given reason, but listen to his successor and see how he slants as much or more, and draw your own conclusions.

"(Later: Our dental mechanic coming from the laboratory to go out to lunch, reported that Radio WMCA had given part of a news broadcast to a report that a plane-load of scientists had been rushed West (no detailed location) to examine some 'unknown material' thought to have been dropped by a 'Saucer'. We find no other radio or newspaper report on this.

Dr. H.R. Brooklyn 1, N.Y.
8-23-54

(The Usual Run-around) :

"This should interest you. I wrote National Cancer Institute for information re the Koch Treatment and was told it had been investigated by Yale University with negative results; and that they had investigated it in 1937, and in 1944-45. I wrote Yale Medical School and was told they had no knowledge of such tests. I again wrote the National Cancer Institute and was told the results of the Yale tests were published in Cancer Research, Vol. 2 No. 4. Examination of this article revealed it to be a report of work done by the Dept. of Pathology of Yale Medical on a substance called di-hydroxymethyl peroxide, suggested by Professor Maisin of Louvain University. This report had nothing to do with the Koch preparations. I also asked the Cancer Institute where I could obtain a copy of the results of their tests of Koch preparations. I was told the results had never been published.

"I shall write to my congressman and my senators and ask them why a tax supported institution is deliberately misleading the public by trying to make it appear that Yale University tested the Koch preparations and found them valueless. In my opinion the National Cancer Institute has not published the results of its tests (if these were actually made) for the reason that they know the report would not bear too close scrutiny. . . A petition is being circulated to try to persuade Dr. Koch to return to the United States . . .

(Assoc. W.B.- Ky.) *

(Note: Assoc. W.B., like other contributors, can be reached by letters sent in care of BSR Hdqrs., with request to forward. Please be explicit in referring to printed material - volume, issue, date, page, name etc. when possible. Some of our publications have been issued for eight years and are NOT indexed.

Note 2. The Drosnes-Lazenby Cancer Clinic (in reply to inquiries) is in Bloomfield, Penna. It has been operating successfully for about five years. This clinic accepts terminal cases only (cases abandoned by physicians), and continues to gain ground against the same kind of venomous attacks as encountered by Koch, Hoxsey, Hett, Nichols and others. The Independent, the "first and only weekly newspaper published in Bloomfield, ran a series of illustrated front page articles on the D.-L clinic, from Dec. 20, 1951, to Jan. '53. Frank Edwards, also heartily hated by you-know-whom, gave a series of broadcasts describing the remarkable results of the D-L treatment, with blistering implications as to medical "authorities" -- The INDEPENDENT sells at 5 ¢ per copy, \$2.00 per year.

BORDERLAND SCIENCES RESEARCH ASSOCIATES

3524 Adams Ave., San Diego 16, Calif.

PARTIAL LIST OF ORGANIZATIONS & INDIVIDUALS STUDYING THE UNIDENTIFIED FLYING OBJECTS (FLYING SAUCERS - AEROFORMS) THAT HAVE MANIFESTED THEMSELVES THROUGHOUT THE GLOBE -

Issued by R.E. Bartlett, Jr., 2154 Woodward Ave., Lakewood 7, Ohio, USA. June through Sept. 1954; in English and French. English version reproduced by permission, by the BSR Hdqrs., Meade Layne, Director. Minor changes, annotations etc. from the Bartlett Partial List are indicated by a double asterisk - ** or the initials "ml". The letters "BPL" indicate the Partial List as source.

Order of the items: Australia - England - France - New Zealand - Tasmania- USA.

1. The Australian Flying Saucer Bureau. 3 Ferguson Ave., Fairfield, N.S.W. Australia. Director: Mr. Edgar R. Jarrold. Publication: The Australian Flying Saucer Magazine. The leading civilian Australian organization. The Australian Govt. refers all reports of UFO to the AFSB, which enjoys government confidence. Active, cooperative. Four times per year.
2. The Australian Flying Saucer Investigating Committee. GPO Box 578, Melbourne, Victoria, Australia. Not cooperative. Does not support interplanetary theory. Not apparently active.
3. South Australia Branch of the Australian Flying Saucer Bureau. 22 Northcote St., Kilburn, South Australia. Mr. Fred Stone, President. Refer to AFSB (#1 sup.) for details.
4. The Flying Saucer Club. 42 (22?) Rothbury Road, Hove 3, Sussex, England. Mr. Richard Hughes, President. Pub., Flying Saucer News. Four times a year. Affiliated with British Flying Saucer Bureau (#5, infra.). Active. Cooperative.
5. The British Flying Saucer Bureau. 17 Chedworth Road, Horfield, Bristol 7, Eng. Active, cooperative. Research Section. Refer to F.S. Club, sup. # 4.
6. Harold Wilkins, author, explorer. His book, Flying Saucers on the Moon, pub. by Peter Owen, Ltd., 50 Old Brompton Road, London S.W. 7; 320 pgs., 16/ or \$2.60 - also distributed by the Citadel Press, 222 - 4th Ave., N.Y. 3 - NY, under the misleading title Flying Saucers on the Attack, @ \$3.00. Mr. Wilkins address: Colomberie, 29, Bean Rd, Bexleyheath, Eng. The book is an admirable piece of work not sufficiently known. Highly endorsed by the Bartlett Partial List (BPL). **.
7. Ouranos: International review of F.S. and related problems. Bondy, Seine -- Address Mr. E. Biddle, 1513 High Road - Whetstone, London, N. 20, Eng. Editions in both French and English. Affiliated with FS Club, # 4 sup. Active, cooperative.

8. Civilian Saucer Investigation of New Zealand. PO Box 1914, Auckland, New Zealand. #1 Nissan Place, Onehunga, Auckland, N.Z. President, Mr. H.H. Fulton. Publication: Flying Saucers. Said to be the leading N.Z. investigative group. - 4 times per year. Cooperative.
9. Hamilton Flying Saucer Investigation Society. 164 River Road, Claudelands, Hamilton, New Zealand. No pub. as yet. Info. supplied to date has been authentic. Active and cooperative.
10. Flying Saucer Investigators. 10 James St., Claudlands, Hamilton, N.Z. No pub. as yet. Active, cooperative. Organization has theory ready for evaluation.
11. Flying Saucer Investigation Club. 21 Maungakeikei Ave., One Tree Hill, Auckland, N.Z. No pub as yet. Formed by 16 primary school pupils. Active & cooperative.
12. Civilian Saucer Investigation of New Zealand. Refer to C.S.I. of Auckland (#8) for detailed information. Dunedin Branch of the CSI is at 860 Cumberland St., Dunedin N.I., New Zealand.
13. New Zealand Interplanetary Society. 55 Tedder Ave, Christ Church, N.Z. Formed by nucleus of CSI "Honorary Observers".
14. Interplanetary Research Group. 357 Argyle St., Hobart, Tasmania. Pub. an IRG Review. Astronomical research, but special interest in UFO. Active and cooperative.
15. Donald Keyhoe (U.S. Marine Corps, rtd. C/ Fawcett Pub. Inc. (True Magazine) 67 W. 44th St., N.Y. 36. "A leading authority - has pub. two excellent books on the UFO" (B.P.List). Active & cooperative.
16. Harold Wilkins: See item 6 for his Flying Saucers, English & USA editions (ml)
17. Gray Barker. Box 91, Clarksburg, West Virginia, USA. Pub. of Saucerian Magazine. Active & cooperative.
19. Flying Saucers International. P.O. Box 34, Preuss Station, Los Angeles 35, Calif. Max B. Miller, President.
20. Aerial Phenomena Research Organization. Sturgeon Bay, Wisconsin, USA. Active & cooperative.
21. Saucer Phenomena and Celestial Enquiry. 19 East Ave., West Haven 16, Conn. USA. Active and cooperative.
22. Flying Saucer Researchers. P.O. Box 853, Brookly 1, N.Y. Elliott Rockmore, Director. Pub., Flying Saucer Review. Newspaper clippings collected and studied. Active, cooperative.
23. Borderland Sciences Research Associates. 3524 Adams Ave., San Diego 16, Calif. Meade Layne, M.A., Director. A non-profit organization active for 8 years past in study of the UFO. Pub. 2 periodicals. Maintains the "4-D" (or Etheric or Emergent) interpretation of the UFO. Information on request, from San Diego Hdqrs.) *-ml

NOTE: We enclose herewith one page from our bi-weekly CLIPS & QUOTES, C-6, which lists some 9 or 10 items of the Bartlett Partial List, as closed down or unsatisfactory. Also, pgs 5 & 6 from Clips & Quotes C-4. We have not yet had time to integrate these data and there are some repetitions. Five pages in all, including these two of the Bartlett list.
